Neu-Isenburg, March 6, 2024 - It is becoming increasingly clear that the international influence on kgs' prospects and customers is growing constantly. That's why the company is now also focusing on English-language webinars. The next one will take place on March 14. The topic: SAP archiving in Microsoft Azure.

Even though SAP and Microsoft are increasingly appearing together and promoting straightforward archiving in Azure, the move to the Microsoft cloud present a few stumbling blocks. In this webinar Benny Schröder, Head of Development & Delivery at KGS Software GmbH, reveals "SAP archiving in Microsoft Azure: checklist to get started" what to look out for when moving the archive.

The focus is on numerous insights from the various archiving projects that kgs has already successfully implemented with its customers. Benny also provides information on important conditions when selecting technology, the costs to be calculated and compliance guidelines to be observed. The Azure services with regard to AKS and the possibilities of hybrid archiving will also be discussed in this compact Fun-Fast-Focus webinar.

"The Azure cloud offers very attractive options for document archiving. If you approach the move with a good time margin, stay on top of the stumbling blocks and are guided by the experiences of other companies, migrating the archive to the cloud is an important contribution to a company's data security, sustainability and future-proofing," summarizes Benny.

press release

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner. Also, the tia® CMIS interface was officially certified by SAP in 2022 as the first in the market.
