kgs

intelligent archiving with kgs and tia®

Brief Presentation of KGS Software GmbH

our mission

What´s behind kgs

KGS Software GmbH with headquarters in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top global companies for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using efficient, lean software.

Under the brand "tia®" – the intelligent archive – kgs has been uniting all product modules into one common vision of the intelligent document archive since 2020. tia® signifies autonomous archiving, can be connected to any applications, storage solutions and cloud technologies and provides companies with the single point of truth (SPoT) for accessing documents. Since 2005, kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide and is a global SAP Value Added Solutions Partner.

Winfried Althaus
CEO at KGS Software GmbH

We are proud of our history. However, our strength comes from the fact that we have taken on board the current pace of development in everything high-tech, and the fact that we demonstrate the spirit of all that is innovative and new on a daily basis

kgs has earned the trust of top companies worldwide, for more than 20 years now.

Marcus Velten / Senior SAP
Technical Administrator
at 1&1

Of course, ease of operation was not the only reason for the choice; kgs's more advantageous licensing model was another argument in this manufacturer's favour. It means that we can expect to break even as soon as 18 months following system launch.

Volker Blum / Head of SAP
System Basic Support
at TRUMPF

Apart from kgs, we couldn't find a manufacturer who was able to implement our specific requirements within this unique construct in their solution and who immediately understood what we were about.

... SAP is a key application in your company?
... You are looking for an alternative data and document management solution?
... You want to reduce costs?

future ready?

It is time to act!

Cloud-Strategies

Are you planning to implement cloud systems or hybrid scenarios? Then you should definitely rethink your document management strategy now by shifting your focus to central archiving concepts and the cloud-capable CMIS interface standard!

Transition to S/4HANA

Are you planning to migrate to S/4HANA? A sound strategy to establish cost-sensitive and flexible data and document management is more important than ever. It's all about "clearing out the basement" before making the transition.

ArchiveLink® Operation

ArchiveLink® will not survive the cloud era. However, you can migrate your existing ArchiveLink® inventories to the new SAP-independent, cloud-optimized CMIS standard in time and with little effort, either via migration or with a smart proxy solution.

Goodbye ECM/DMS

Our customers have found that a smart, lean archiving system for SAP data and documents can completely replace their feature-bloated, costly DMS/ ECM system. ROI is achieved in a very short time, and the migration is carried out without impacting ongoing operations.
