New: Archiving Health Check to raise awareness among companies

kgs provides online query for checking the archiving quality of companies.

Neu-Isenburg, 13. Juli 2023 - In order to support companies in the best possible long-term storage of sensitive business data, the archiving specialist kgs is now offering on its website a free [Archiving-Health-Check](#).

The answers to a total of 12 questions, which can be answered in just a few minutes by IT administrators or archiving experts, form the basis of a status quo analysis that kgs sends to participants in the health check as a follow-up. The check clarifies what data is involved, the extent to which SAP data records are affected, the regularity with which archiving runs are carried out, or what the current archiving landscape of a company looks like. Aspects such as the amount of data to be stored, the type of data, the previous security standard and the requirements for the scalability of the archiving system will also be addressed. Finally, an assessment of the existing archiving system will be given - from not good to medium to very solid.

Such an analysis can be of great importance for companies right now, as the entire archiving landscape is undergoing an ever-increasing shift from on-premise to cloud solutions. In this sense, a pragmatic assessment of the current state of an archive can have a massive impact on future-proofing and operational costs.

Based on this assessment, which is determined via the [kgs Archiving-Health-Check](#), kgs participants receive a professional assessment of the inventory system on the one hand, as well as a customized proposal on how to set up the archiving system in a future-proof manner on the other.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. Since 2005, kgs has certified ArchiveLink® and ILM interfaces for SAP worldwide and is a global SAP Value Added Solutions Partner. In addition, the tia® CMIS interface was officially certified by SAP in 2022 as the first in the market. Further information at: <https://www.kgs-software.com/en>
