Neu-Isenburg, September xy, 2023 - In line with this year's DSAG motto "Wonderfully versatile", KGS Software GmbH is focusing on the presentation of the new tia® core product line at its trade fair appearance (booth I9).

Practical experience shows that companies that gradually implement the change to the cloud find it easier than those that implement this change in one step. As a result, a transitional variant in the form of a hybrid cloud and on-premises landscape has now been established. To be on the safe side, it is advisable to use a hybrid approach to archiving the documents. This is where the intelligent archiving line tia® core comes in, which can easily be booked as a monthly subscription.

Such parallel operation not only has the advantage that a document archive based on cloud-native software optimally prepares a company for day X of the SaaS conversion. Rather, those responsible learn step by step how the IT infrastructure can be successfully orchestrated across all areas. With the experience of such an archiving project, a solid basis can be laid for further cloud projects and the entire changeover.

"The fact that our approach hits a nerve is shown not least by the fact that the annual congress of the German SAP user group has also taken up the cause of change and the need for common future perspectives," says Johanna Zinn, Head of Marketing at kgs. "As an established SAP partner, we want to support the strategy of SAP and the transformation projects of our customers as best we can with our portfolio and our services."

Together with the other exhibitors, kgs has set itself the task of providing orientation to visitors to the congress who are looking for the right approach to digital, technological, ecological and economic change. The company is therefore not only presenting the new product line, but also numerous practical examples from well-known companies that are already successfully implementing their archiving with kgs solutions.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner. Also, the tia® CMIS interface was officially certified by SAP in 2022 as the first in the market.
