

Ready for the SAP S/4HANA Transformation?

Checklist gives companies guidance when moving to the cloud

Neu-Isenburg, September 20, 2023 - The upcoming end of support for SAP ECC is getting closer and closer and the window of opportunity to move to SAP S/4HANA is closing. HANA database technology is very expensive, especially when certain thresholds are exceeded in higher volumes. Therefore, it is advisable for companies to start the transformation by setting up their archiving concept for the future. KGS Software GmbH has published a [checklist](#) for the change to the cloud.

The checklist scrutinizes the various aspects of data, document and archive management, because these are not only cost-intensive, but also time-consuming. In addition, storing large amounts of data on HANA is cost-intensive and not very sustainable. This makes it all the more important to set the right course right away when changing systems, i.e. to introduce the right archiving principle.

With its 10 questions, the checklist leads the reader to various insights and in this way helps companies know where they need to proceed with particular care even before the start of their migration project. From the question of how to deal with unstructured data, retention requirements, the new CMIS technology, to questions about the in-memory database, cost savings and compliance challenges, the checklist addresses all the important archiving aspects of a migration to the cloud.

KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner. Also, the tia® CMIS interface was officially certified by SAP in 2022 as the first in the market.
