Neu-Isenburg, April 11, 2024 – KGS Software GmbH is expanding its portfolio and closing the gap between SharePoint and the various storage solutions with the tia<sup>®</sup> Connector. With the new solution, SharePoint data can be archived easily, compliantly and reliably.

SharePoint, Teams and other Microsoft services have become an integral part of companies' daily business. While meetings are held in Teams, data is usually exchanged via SharePoint. Documents play a central role in these processes - including those that are subject to legal retention requirements and whose immutability must be guaranteed over a long period of time. As Microsoft does not currently cover these criteria adequately, kgs has developed the tia<sup>®</sup> Connector archiving platform for SharePoint. This is a smart component based on cloud technology that is characterized by its ease of use.

### Compliance with a fully integrated solution

"With the tia<sup>®</sup> Connector, we are fulfilling the great wish of many existing customers to enable an easy-to-implement archiving scenario for their documents in SharePoint, similar to their lean SAP archiving. We are proud of this exciting further development of our tia<sup>®</sup> family," says Benny Schröder, Head of Development & Delivery at KGS Software GmbH.

The tia<sup>®</sup> Connector was designed for SharePoint Online on the basis of Power Automate so that it can be used directly from SharePoint. The user can simply click on the archive button in a new column and important SharePoint content is archived.

# press release

Interested parties can find out more about the handling and advantages of tia® Connector for SharePoint in the **webinar "SharePoint archiving? How to do it legally compliant, fast and user-friendly"**, which will take place on **May 17, 2024 at 10 a.m.** More information and registration here: <https://attendee.gotowebinar.com/register/5875142964438898782?source=PR>

## KGS Software GmbH

KGS Software GmbH, headquartered in Neu-Isenburg near Frankfurt am Main, has been the digital archive specialist for top companies worldwide for over 20 years. Data and documents from SAP as well as documents from other leading applications are migrated and archived using high-performance, lean software. Under the brand "tia®" - the intelligent archive - the archive manufacturer has been uniting all kgs product modules into a common vision of the intelligent document archive since 2020. tia® stands for autonomous archiving, is connectable to any applications, storage solutions and cloud technologies and offers companies the single point of truth (SPoT) for accessing documents. kgs has been certifying ArchiveLink® and ILM interfaces for SAP worldwide since 2005 and is a global SAP Value Added Solutions Partner. Also, the tia® CMIS interface was officially certified by SAP in 2022 as the first in the market.
